Guide to Reducing Readmissions

Contributing Authors

Pam Aldridge, manager of care management at Durham Regional Hospital

Nora Baratto, case management manager, St. Peter's Hospital's CHOICES

Jan Berger, MD, chief medical officer for Silverlink Communications, Inc.

Michelle M. Berry, director, CASA (Community Alternative Systems Agency) in Broome County, N.Y.

Lenore Blank, administrative manager, Hackensack University Medical Center

Danielle Butin, former director of Northeast Health Services for Secure Horizons, United Healthcare

Beth Chester, PharmD, MPH, BCPS, senior director of clinical pharmacy services and quality for Kaiser Permanente Colorado

Mary Cooley, manager of case and disease management at Priority Health

Dianne Feeney, BSN, MS, associate director of quality initiatives for the Maryland Health Services Cost Review Commission (HSCRC)

Michele Gilbert, education coordinator of the heart failure team, Hackensack University Medical Center

Dr. Larry Greenblatt, medical director, Chronic Care Program, Durham Community Health Network, Duke University Medical Center

Dr. Randall Krakauer, national medical director, Medicare at Aetna

Gregg O. Lehman, Ph.D., president and chief executive officer of Health Fitness Corporation, (formerly president and chief executive officer of INSPIRIS)

Diane Littlewood, R.N., regional manager of case management for health services at Geisinger Health Plan (GHP)

Doreen Salek, director, business operations of health services, GHP

Joann Sciandra, R.N., regional manager of case management for health services, GHP

Susan Shepard, patient safety education director, The Doctors Management Company

Jessica Simo, program manager, Durham Community Health Network for the Duke Division of Community Health

Janet Tomcavage, Geisinger Health Plan vice president of health services.

Glossary 137**About the Authors 140**

Editor's Note

Welcome to the Healthcare Intelligence Network's *Guide to Reducing Readmissions*. To avoid leaving reimbursement money on the table, healthcare organizations are working hard to reduce avoidable rehospitalizations, especially among the Medicare population. Healthcare reform legislation provides further motivation by offering incentives for programs that improve the efficiency and affordability of the healthcare system.

The *Guide to Reducing Readmissions* examines eight top tactics that healthcare organizations are implementing to close some of the care gaps that contribute to hospital readmission rates, according to responses to the Healthcare Intelligence Network 2010 survey on Reducing Readmissions.

Each chapter in this guide provides case studies and lessons learned from early adopters that are utilizing these tactics to improve the quality and efficiency of care delivery while keeping patients from returning to the hospital unnecessarily.

Chapter 1: Overview

Chapter 2: Case Management

Chapter 3: Care Transitions Management

Chapter 4: Telephonic Monitoring

Chapter 5: Hospital Discharge Planning

Chapter 6: Medication Adherence, Reconciliation & Review

Chapter 7: Home Visits

Chapter 8: Patient Education & Coaching

Chapter 9: Provider Incentives

Chapter 10: Q&A

The benefits of these strategies is by no means limited to the reduction of avoidable readmissions. All of these efforts serve to tighten care coordination and improve healthcare quality across the healthcare continuum when used in care delivery systems such as the patient-centered medical home as well as in health management programs.

Melanie Matthews, HIN executive vice president and chief operating officer
